Wooden Acoustic Panel

Colors

The boards have a natural color (NATURE) that may present uneven nuances due to the natural raw materials, wood and cement, or they can be painted to ensure uniform color, without altering the acoustic performance.

NATURE

مشخصات : آکوستیک ، آنتی باکتریال ، نسوز ، ضد آب و انجماد ، سازگار با محیط زیست ، تضمین عمر بالای ۷۰ سال

Mineralised fir wood wool, bound with Portland cement. CELENIT boards are made of **wood wool** and mineral binders, mainly **Portland cement** and **marble dust**.

Fibres are mineralised: the process stops the biological deterioration, making the fibres totally inert. In addition to retaining wood's mechanical properties, it increases the level of resistance. Fibres are coated with Portland cement and bound together under pressure to form a **steady, resistant, compact and durable structure**.

The characteristics of CELENIT panels, such as mass, porous structure, low elastic modulus and internal absorption effect, make them very suitable to reduce background noise (**sound absorption**) and to shield sound transmissions (**sound insulation**).

CELENIT ACOUSTIC | DESIGN provides a range of advanced solutions that combine high **sound absorption** performance with the **sustainability** and eco-compatibility of a natural product, which is both aesthetically attractive and mechanically **resistant**.

در دل هر انسان شجاعی یک شیر خفته است
